

## Reliable. Cybersecure. Network-Optimized. Intelligent Video Surveillance Solutions & Appliances

Razberi's intelligent video surveillance solutions provide all of the rightsized pieces for a network-optimized video surveillance system including datacenter, edge and rugged environments. Razberi automates and leverages AI-based cybersecurity protection from the datacenter to the edge for cameras and IoT devices. Security leaders can proactively monitor the health of the surveillance network, get real-time cyber threat notifications, and access analytics with standards-based integration. As always, Razberi is open to work with world-class VMS solutions and megapixel IP cameras.

### CYBERSECURITY

#### Razberi CameraDefense™

Award-winning, automated camera hardening to protect surveillance and other networked devices from cybersecurity threats. Proactively manage and deploy best practices on hundreds or thousands of cameras and IoT devices in minutes.

- Block unauthorized IoT devices by binding cameras and other IoT security devices to the network preventing unauthorized devices from using Ethernet ports.
- Automatically restrict camera access to whitelisted IP addresses, blocks camera traffic to the public Internet, flags weak passwords.
- Denies un-needed and potentially dangerous camera services with a next-generation firewall.

### MONITORING

#### Razberi Monitor™

Because mission-critical surveillance is predicated on high availability; monitoring is critical to security leaders. Razberi provides remote and local tools to securely monitor the health and cybersecurity of the video surveillance system. It supports standards-based interfaces for real-time notifications. Available in LAN and cloud-based solutions.

### ANALYTICS

#### Razberi Analytics™

Video analytics integration certified to work with leading AI solutions. For applications such as critical infrastructure protection, real-time video surveillance data can be used for performance beyond our human capabilities such as accurate object detection, continuous wide-area situational analysis, PTZ tracking and more.

### Razberi INTELLIGENT SURVEILLANCE PLATFORM

No matter the size of the enterprise or organization, Razberi can right-size the solution, deliver network-optimized architecture without compromising video quality, and automated cybersecurity protections. Our solutions include:

#### Razberi Core™

Server-class appliances that are cybersecurity-hardened and purpose-built to centrally record and manage a heavy video surveillance workload. High performance, redundant, high capacity storage and analytics.

#### Razberi Edge: ServerSwitchIQ™

Razberi's flagship edge appliances that far outshine a standard NVR. Powerful, cybersecurity-hardened appliances built to record and manage video at the network edge. Automatically secures network connections with cameras and other IoT devices. Reduces network resources to preserve high quality video.

#### Razberi Rugged™

Environmentally tough and cybersecurity-hardened network appliances built to record and manage video at the network edge in dusty, temperature challenged conditions. Automatically secures network connections with cameras and other IoT devices. Reduces network resources to preserve high quality video and ready for standard enclosures.

#### Razberi EndpointDefender™

Intelligent network appliances that automatically secure network connections to cybersecurity-harden cameras and IoT devices. Effective and responsible scalability. Offers interoperability with legacy servers and NVRs.

### Razberi - Easy to Buy. Simple to Support. World-Class Partners.

#### Razberi Shield™

Providing smart financing options to buy video surveillance solutions. Learn more: [Razberi.net/Shield](http://Razberi.net/Shield).

#### Razberi OnSite™ Support

To support mission-critical security, our on-site support offering can expedite equipment and technical support to reduce downtime. Available in contiguous U.S.

#### Razberi World-Class VMS Partners

We're proud to offer an innovative, open solution that works with world-class camera manufacturers, technology partners and VMS providers.
