Conference Solutions

Snom's conference phones provide a reliable solution that demonstrates 15 years of investment in telephone engineering. These phones are a powerful business tool that improve and encourage teamwork by enabling multiple callers to join the same call. Snom's proven voice quality and powerful software enable the best sound quality, while DECT 6.0 technology enables users to spread out and still be heard with the built-in expansion microphones. In today's business environment, it is more important than ever for users to collaborate. Snom's audio conferencing is an easy-to-implement solution that saves time and boosts productivity.

Enterprise Mobility - Single & Multi-Cell

Meet the Workplace Mobility Family. Digital Enhanced Cordless Telecommunications (DECT) is an industry standard that provides workplace mobility. A DECT phone allows you to roam the office while you talk. The Snom family of DECT products ensures that business users don't sacrifice functionality and quality with increased mobility. DECT product users can move from their desks without losing the ability to manage incoming inquiries.
