

## A Jenne, Inc. Exclusive Brand High Performance Optics and Connectivity Solutions

### When velocity matters, choose *Veloso™* for your network connectivity solutions.

- High Quality Optics for high performance networks
- Purpose Tested - System Specific Qualified
- 1,000's of Solutions Available
- Ability for Customization
- Exceptional Customer Service and Technical Expertise
- Lifetime Warranty

### Transceivers

Veloso™ transceivers seamlessly scale any network, while offering quality that exceeds the OEM. They expand network reach, increase bandwidth and improve network performance - ALL without voiding SmartNet or any additional SLA.

### Direct Attach & Dual OEM Cables

Our Direct Attach Cabling line come in lengths up to 15m for copper (Twinax, CX4) or up to 100m for fiber (AOC). We offer both active and passive solutions for copper cables. Veloso™ also offer the solution to connect two different OEM switches with one Direct Attach Cable.

### Patch Cables

Veloso™ offers a variety of patch cables and accessories that provide seamless connectivity for all your current and future network hardware needs.

### Media Converters

Veloso™ complete line of media converters offer the ability to convert copper to fiber or fiber to fiber. This is a cost effective solution that helps extend your network reach without weakening speed, security or reliability.

### Network Interface Cards

Veloso™ full line of superior quality and low cost NIC cards help enhance network performance. The NIC cards are designed to provide high performance in multi-processor systems by efficiently balancing network loads across multiple Central Processing Units (CPUs).
