Jenne's Cloud Solutions

SD-WAN Solution

Edgewater Networks is a market leader in enabling IP-based voice, video data and software-defined wirde area network (SD-WAN) services. Service providers and enterprises of all sizes use Edgewater Networks solutions to simplify customer premise configurations for quick and smooth installations,reduce time to market and deliver rapid return on invested capital. The company helps customers deliver intelligence at the network edge with its Network Edge Orchestration platform that includes Intelligent Edge ESBCs and QuickConnect certification program, and the EdgeView Service Control Center.

FatPipe® Networks invented the concept of software-defined wide area networking (SD-WAN) and hybrid WANs that eliminate the need for hardware and software, or cooperation from ISPs and allows companies and service providers to control multi-link network traffic. FatPipe currently has 10 U.S. patents and more than 180 technology claims related to multipath, software-defined networking and selective encryption of broadband networks. FatPipe technology provides the world's best intra-corporate wide area network solutions that transcend Internet and other network failures to maintain business continuity and high transmission security. FatPipe, with several thousand customers, has offices in the United States and around the world, with more than 700 resellers worldwide including almost all national resellers in the US. FatPipe is a registered trademark and FatPipe VNF is a trademark of FatPipe, Inc. Other product and company names herein may be trademarks of their registered owners.

SD-WAN technology leader providing improved performance, security and real-time visibility. InSpeed Quality Service™ (IQS) is the first and only SD-WAN solution purpose built to make voice, videoconferencing and cloud-based applications work as promised over every WAN connection, all the time.
Our breakthrough technology enables crystal clear voice calls, crisp videoconferencing and responsive applications over a WAN connection. It's a simple, yet powerful solution that saves companies money, and adds real-time visibility. InSpeed provides the full suite of quality and security services over a single Internet connection, and for the most effective business continuity and redundancy, also supports simultaneous multiple connections from independent providers. Because security is so important at remote and branch offices as well as headquarters, we have integrated security services in our standard product. We establish an enterprise wide Virtual Private Network (VPN) to protect company data as it travels over the Internet—and we do it over commodity broadband connections, provisioned with a single click. We also include standard "best practices" Firewall security services to automatically protect your remote office's Internet connections from unwanted attacks.
