Radvision, an Avaya company, is a leading provider of products and technologies for unified visual communications over IP, wireless and emerging next-generation networks. Radvision’s latest innovations include high performance room systems, unmatched telepresence and desktop communications, and mobile conferencing solutions. Radvision’s SCOPIA product portfolio provides comprehensive and powerful visual communications that allow advanced voice, data and video conferencing. The SCOPIA product offering includes network infrastructure solutions for multi-party conferencing, network connectivity and firewall traversal; endpoint solutions for board rooms, conference rooms, desktop and personal video conferencing; and management software for scheduling, device and bandwidth management and directory services.
Radvision®, an Avaya company, is a leading provider of video conferencing and telepresence technologies over IP and wireless networks. We offer end-to-end visual communications that help businesses collaborate more efficiently. Together, Radvision and Avaya are propelling the unified communications evolution forward with unique technologies that harness the power of video, voice, and data over any network. www.radvision.com.

Radvision’s Scopia product portfolio provides comprehensive and powerful visual communications solutions that allow advanced voice, data and video conferencing. The Scopia product offering includes network infrastructure solutions for multi-party conferencing, network connectivity and firewall traversal; endpoint solutions for board rooms, conference rooms, desktop and personal video conferencing for Bring Your Own Device (BYOD) initiatives; and management software for scheduling, device and bandwidth management and directory services.

The Scopia product portfolio is a powerful combination of hardware and software products that is fully standards-based and offers the highest performance available in today’s video conferencing solutions. Interoperability and interconnectivity is provided between any video-enabled device, such as a telepresence system, a conference room, a desktop or mobile video system, and with other telephony and unified communications solutions. Scopia solutions are used by institutions, enterprises, and service providers to create high quality, easy-to-use voice, video, and data collaboration environments, regardless of the communication network – IP, SIP, 3G, 4G, H.323, ISDN or next generation IMS.

**Radvision Scopia Solution Benefits**

- **Powerful Room Systems:** The Scopia XT5000 is the industry’s most powerful room system in its class with dual 1080p/60fps live video and content.
- **Market Leading Price-Performance:** Scopia XT4200 room systems deliver the perfect blend of value and a high quality, high-end experience making them stand out amongst the competition.
- **H.264 High Profile:** Powerful compression technology delivering the latest in bandwidth efficiency for HD video.
- **H.264 Scalable Video Coding (SVC):** With H.264 SVC, the Scopia solution provides full interoperability with existing devices while delivering the benefits of very high network error resiliency.
- **Apple iPad Control:** Scopia Control provides iPad Multi-Touch control of Scopia room systems for enhanced capabilities.
- **Executive Desktop Systems:** The Scopia VC240 HD desktop system integrates high performance video conferencing into a high resolution, 24-inch LCD monitor at a very competitive price.
- **Desktop Software Client:** Scopia Desktop software provides easy to deploy HD video conferencing for PCs and Macs.
- **Mobile / BYOD Support:** Scopia Mobile extends HD video conferencing and control to the latest mobile devices.
- **Advanced Data Collaboration:** The Scopia solution delivers H.239 interoperability across all systems including the latest mobile devices along with the ability to review previously shared materials.
- **Connectivity:** Scopia solutions allow connectivity between any standards-based video communications device including revolutionary multi vendor, multi-stream telepresence connectivity.
- **Simplicity:** Scopia solutions are designed with the end-user in mind and focused on ease-of-use and simple deployment.
- **Distributed Architecture:** Every component of the Scopia solution is designed for deployment in a distributed IP network.
- **Unified Communications Interoperability:** Interoperability with the leading unified communications solutions.
Scopia® XT Telepresence Platform
The Scopia XT Telepresence Platform creates a lifelike, immersive experience replicating the feeling of meeting in-person. The XT Telepresence Platform is customizable to the unique requirements of individual rooms and customer needs. Installed and configured by Radvision’s worldwide network of channel partners, the XT Telepresence Platform provides a cost-effective and highly flexible approach, enabling partners to meet the unique needs of each customer deployment. With a Radvision partner, customers can define the installation and furnishings that best fit within their conference room and budgets to deliver a distinct customized telepresence experience.

- 3 simultaneous 1080p/30fps video streams
- H.239 data collaboration @ 1080p/30fps
- 3 Sony EVI HD7 cameras
- Precise camera calibration and setup program
- Scopia Control for the Apple iPad user interface

JENNE PART NUMBER:
54111-00006

Scopia® XT5000 Room System
The Scopia XT5000 is Radvision’s flagship product in the Scopia series of room systems. The XT5000 is the only system in the market to incorporate dual 1080p/60fps live video and content, HD audio, simultaneous H.264 High Profile and Scalable Video Coding (SVC), and multi-party calling. The PTZ camera, supporting 1080p/60fps, offers 10x optical zoom (40x digital) and wide-angle capability for viewing details and an entire group. The second video stream can be used with an additional camera or for high resolution 60fps data and content sharing. An embedded MCU with support for continuous presence with up to 9 participants is available. The advanced audio system delivers CD-quality, 20 kHz audio and includes a 3-way beam forming digital microphone pod that isolates the speaker from the noise. The user interface is designed for simplicity along with Apple iPad control for enhanced capabilities. The XT5000’s refinement goes beyond the user experience to modern hardware design that complements any conference room.

- 2 simultaneous 1080p/60fps video channels
- 1080p/60fps 10x optical zoom camera
- H.264 High Profile and H.264 SVC
- H.239 data collaboration @ 1080p/60fps
- 3-way beam forming digital microphone, 20 kHz CD-quality audio
- Scopia Control for Apple iPad
- Optional 4 or 9 port embedded MCU

JENNE PART NUMBER:
55211-00001

Scopia® Control
Scopia Control is an Apple iPad application for control of Scopia video conferencing room systems. Scopia Control’s highly intuitive user interface virtually eliminates the learning curve for using a video conferencing system. First time users can initiate calls, control their systems and moderate meetings without any training or introduction. The integrated conference room calendar and enterprise directory makes it easy to join meetings and invite others. Room system control and meeting moderation are simple through the iPad Multi-Touch user interface. Users can view presentations, spreadsheets, documents and images with standards-based H.239 data collaboration, and can also review previously shared materials without interrupting the presenter with Radvision’s unique advanced data collaboration/slider function.

- For Scopia XT room systems and telepresence
- Integrated conference room calendar
- Call by integrated corporate directory, IP address, E.164 or SIP URI
- H.239 data collaboration with review
- Meeting moderation
- Streaming, recording, and video layout control
- Access troubleshooting details

JENNE PART NUMBER:
55111-00017
Scopia® XT4200 Room System
The Scopia XT4200 offers outstanding value and cost-effective HD video communications specifically designed for the needs of smaller and mid-sized conference rooms as well as customers who don’t require all the high-end features offered in the Scopia XT5000. The system is nonetheless incredibly powerful with many features that are either unavailable or costly upgrades in other vendor offerings. The Scopia XT4200 is well equipped and includes dual 720p/60fps live video and content, HD audio, H.264 High Profile and Scalable Video Coding (SVC), dual display support and a wide-angle PTZ camera. The user interface is designed for simplicity along with optional Multi-Touch control via the Apple iPad for enhanced capabilities.
- 2 simultaneous 720p/60fps video channels
- 720p/60fps 5x optical zoom camera
- H.264 High Profile and H.264 SVC
- H.239 data collaboration @ 720p/60fps
- 20 kHz CD-quality audio
- Optional Scopia Control for Apple iPad

JENNE PART NUMBER:
55211-00002

Scopia® XT1200 Room System
The Scopia XT1200 video conferencing room system supports two simultaneous streams of HD video at 1080p/30fps. The PTZ camera, supporting 1080p/30fps or 720p/60fps, offers 10x optical zoom (40x digital) and wide-angle capability for viewing details as well as an entire group. The second video stream can be used with an additional camera or with a PC for high resolution 30fps data and content sharing so presentations and even video clips can be shared with no loss of quality. An optional, embedded MCU with support for continuous presence with up to 9 participants – the highest capacity embedded MCU in the market today, is available. The advanced audio system delivers CD-quality, 20 kHz audio and includes a 3-way beam forming digital microphone pod that isolates the speaker from the noise.
- 2 simultaneous 1080p/30fps video channels
- 720p/60fps or 1080p/30fps 10x optical zoom camera
- H.239 data collaboration @ 1080p/30fps
- 3-way beam forming digital microphone, 20 kHz CD-quality audio
- Optional Scopia Control for Apple iPad
- Optional 4 or 9 port embedded MCU

JENNE PART NUMBER:

Scopia® XT Meeting Center
The Scopia XT Meeting Center is a premium HD room system integrating single or dual 55” 1080p displays in a specially designed cart for a simple and efficient implementation. The mobility of the cart enables the system to be used as a shared resource and is especially effective in education and enterprise environments to quickly create a high quality video meeting space. The XT Meeting Center is powered by Radvision’s flagship Scopia XT5000 - the only system available in the market that includes dual 1080p/60fps live video and content, HD audio, H.264 High Profile, H.264 Scalable Video Coding (SVC) and optional embedded multi-party calling.
- Single or dual 55” 1080p displays
- 2 simultaneous 1080p/60fps video channels
- 1080p/60fps 10x optical zoom camera
- H.264 High Profile and H.264 SVC
- H.239 data collaboration @ 1080p/60fps
- 3-way beam forming digital microphone, 20 kHz CD-quality audio
- Scopia Control for Apple iPad

JENNE PART NUMBER:
54211-00002  D55 Bundle
54211-00001  S55 Bundle
Scopia® VC240 Desktop System
The Scopia VC240 HD desktop video conferencing system was jointly developed combining the best of breed technologies of Radvision and Samsung. The Scopia VC240 integrates advanced video conferencing into a Samsung high resolution 24-inch multimedia LCD monitor. The system delivers to users all the benefits of HD video communications at a fraction of the cost of competing hardware solutions, dramatically increasing the ROI of a video conferencing deployment. The Scopia VC240 can operate as a standalone desktop HD video conferencing system as well as a high resolution PC monitor. With Radvision’s latest advanced video features including H.264 Scalable Video Coding (SVC), users enjoy the highest quality experience possible.

- HD 23.6” widescreen (16:9, 1080p) PC display
- 720p/30fps HD video
- H.264 Scalable Video Coding (SVC), H.264 and H.263 video
- HD internal CMOS camera
- G.722.1, G.722, G.711 audio
- Echo cancellation, automatic gain control and noise suppression
- H.239 dual stream for data collaboration

JENNE PART NUMBER: 98017-00008

Scopia® Desktop Video Conferencing
Scopia Desktop extends a room system application to remote and desktop users for voice, video and data communications. It includes HD H.264 video for both meeting participants and data collaboration and H.264 Scalable Video Coding (SVC) for error resiliency. Scopia Desktop is a simple web browser plug-in that is centrally managed, distributed and deployed without complex licensing fees or installation issues. Automatic firewall traversal allows anyone to participate regardless of where they are. Advanced capabilities including user provisioning and managing personal virtual conference rooms are also available.

- HD video up to 720p
- H.264 Scalable Video Coding (SVC) for extreme network error tolerance
- Microsoft Office and IBM Lotus Notes integration
- Built-in NAT and firewall traversal
- Freely distributable web client
- PC and Mac support

JENNE PART NUMBER: INCLUDED WITH MCU BUNDLES.

Scopia® Mobile
BYOD (bring your own device) is becoming more and more prevalent in the business world, and Scopia Mobile is the ultimate enterprise-grade mobile video application. Scopia Mobile is the industry’s first standards-based mobile video application to enable HD video conferencing and H.239 data collaboration with the nearly two million installed standards-based video conferencing and telepresence systems worldwide. When viewing H.239 content, participants can also review previously shared materials without interrupting the presenter. Scopia Mobile additionally enables users to directly control and manage video conferences through their mobile devices.

- Available for Android and Apple iOS
- Smartphones and tablets supported
- Collaborate with full video, audio and H.239 data
- Review previously presented materials
- Meeting moderation via participants list
- Recording and streaming control

JENNE PART NUMBER: INCLUDED WITH MCU BUNDLES.
**Scopia® Management iVIEW**

Scopia Management (iVIEW) delivers management, control and scheduling for robust video application management and easy-to-use conferencing. Scopia Management provides a single access point for managing all video conferencing devices including Radvision and third party endpoints, infrastructure devices such as MCUs and gateways, and call control applications such as gatekeepers and SIP agents. Administrators can detect and monitor their devices, remotely configure, control and upgrade them. Scopia Management’s scheduling capability offers convenient scheduling, resource reservation and control from a single point. Scalability and redundancy is delivered for large enterprises and service providers including the unique Virtual MCU feature for distributed deployments. With Scopia Management’s Virtual MCU, virtual conference rooms are created for simple access across the deployment.

Integration with Microsoft Active Directory, Outlook and Lync or IBM Lotus Domino, Notes and Sametime is also available.

- Scheduled and ad-hoc conferencing
- Radvision, Cisco/Tandberg, LifeSize, Polycom and Sony endpoint management
- Radvision infrastructure management
- Supports both distributed and centralized deployments
- Microsoft and IBM back office integration
- Multi-tenant for service providers

INCLUDED WITH MCU BUNDLES.

---

**Scopia® ECS Pro Gatekeeper**

Radvision’s high-performance, standards-compliant H.323 ECS (Enhanced Communication Server) Gatekeeper provides an intelligent, advanced backbone management system for IP telephony and multimedia networks. ECS provides gatekeeper functionality and everything required to simply and easily define, control, and manage voice, video and data traffic over IP networks – no matter how large or complex. ECS ensures optimal bandwidth utilization to deliver carrier-grade, best quality call completion and collaborative video communications over any network and any protocol.

- Creates easy PSTN-like dialing for video conferencing
- Supports up to 2,000 calls, 10,000 seats
- Call forwarding policies per dialed number
- Advanced call fallback
- Bandwidth management with Scopia Management

**Base System**

- 55597-00016
- 88597-00008

Each 25 ports / 125 registrations

---

**Telepresence Interoperability**

The Scopia Elite MCU with Telepresence Interoperability is the most interoperable, multi-vendor, multi-stream telepresence conferencing solution available, enabling multiparty communications between different vendor’s telepresence systems in addition to standards-based video conferencing endpoints. This capability of the Scopia Elite MCU allows enterprises and service providers to cost effectively deliver all multipoint communications capabilities in a single platform supporting mobile video devices to high-end telepresence systems.

- Combine telepresence, HD and SD systems in the same conference
- Advanced telepresence video processing
- Up to 30 telepresence video segments supported
- Supports any mix of video segments
- Optimized system layouts
- Video bandwidth – up to 12Mbps

**JENNE PART NUMBER:**

- 55546-00020

**Scopia® Elite 5000 Series MCU**

The Scopia Elite 5000 Series MCU is Radvision’s next generation platform for high definition multi-party conferencing. Utilizing the latest in DSP technology, Scopia Elite’s advanced media processing supports 1080p HD and provides advanced connectivity, dynamic resource allocation, and individual video layouts per participant yielding uncompromised video performance. The Scopia Elite 5000 Series can be configured for a range of HD continuous presence ports providing a line of systems to suit a variety of applications and budgets. Each system can also deliver four times the capacity by utilizing Scopia Elite’s 4X dynamic capacity option for enhanced definition endpoints. This maximizes capacity for mixed endpoint environments without any system configuration changes. This flexible model offers significant value and fast return on investment with up to 120 video conferencing ports per system.

Scopia Elite is the industry’s first standards-based MCU to support advanced H.264 Scalable Video Coding (SVC). Radvision’s SVC provides a high quality experience over unmanaged networks such as the public internet, particularly benefitting desktop video conferencing users on the road or teleworkers from their home offices.

Scopia Elite also offers the Telepresence Interoperability option providing the most interoperable, multi-vendor, multi-stream telepresence multi-party conferencing solution available.

- HD continuous presence and switched video – H.264 @ 1080p/30fps
- H.264 Scalable Video Coding (SVC)
- Up to 28 participants displayed simultaneously
- 24 video layout options • Telepresence Interoperability option
- Full suite of audio and video codecs supported including transcoding
- On-screen interactive control and information overlay • Video auto attendant

**Scopia® PathFinder Firewall Traversal**

Scopia PathFinder Firewall Traversal is a complete firewall and NAT traversal solution enabling secure connectivity between enterprise networks and remote sites. PathFinder maintains the security and advantages of firewall and NAT over heterogeneous video networks and allows seamless integration with existing video conferencing systems and infrastructure components. PathFinder is easily deployed in the DMZ and can be installed on any standalone computer in the network. PathFinder requires no changes to dial plans or E.164 numbers in the conferencing application. Built on a hardened Linux operating system including access control, AES encryption and client authentication, PathFinder provides its own security to prevent attacks by malicious devices. Firewall and NAT problems are handled without upgrading devices or compromising security.

- H.460 compliant including support for multiplexed media
- Client software to support any H.323 endpoint
- Supports up to 80 concurrent calls / 480 registered devices
- Security hardened platform in closed chassis

**JENNE PART NUMBER:**

- 55678-00603 10 ports
- 55678-00604 20 ports

---

**Scopia® Video Gateway for Microsoft Lync**

The SCOPIA Video Gateway for Microsoft® Lync™ provides connectivity for Lync to standards-based video conferencing solutions. The Gateway allows users to realize the benefits of Lync in conjunction with their existing deployments of room-based video conferencing systems, telepresence systems and infrastructure along with protecting these investments. Highly scalable and affordable, the Scopia Video Gateway for Microsoft Lync is the most cost effective solution in the market.

- Up to 10 HD / 20 VGA / 40 CIF calls in any combination
- Unlimited scalability with multiple Gateways
- H.323 system presence to Lync users
- Microsoft RT Video HD transcoding
- Microsoft AV Edge support
- TLS and SRTP for security
- Microsoft UC officially qualified

**JENNE PART NUMBER:**

- 55548-00005 5 ports
- 55548-00001 10 ports

---

**Radvision® SIP Gateway**

The Radvision SIP Gateway extends the reach of IBM Sametime by providing connectivity and interoperability with standards-based video conferencing and telepresence systems and infrastructure. The SIP Gateway allows users to realize the benefits of Sametime in conjunction with their existing deployments of room-based video conferencing systems and protecting these investments. The SIP Gateway also enables connectivity with new visual communication solutions such as telepresence and video on mobile devices in support of BYOD (bring your own device) initiatives.

- H.323 / SIP communications
- Each system supports up to 60 calls
- Unlimited scalability with multiple systems
- H.264, H.263 video
- G.722, G.711 audio
- SIP ICE, IBM STUN / TURN, H.460 firewall traversal
- TLS, SRTP, H.235 AES encryption

**JENNE PART NUMBER:**

- 55679-00001

---

**Scopia® Gateway**

Today’s video conferencing deployments are often a mix of different systems with varying capabilities deployed on different networks. Scopia Gateways provide seamless connectivity between different networks and standards to deliver feature-rich, reliable, multimedia conferencing and collaboration. Scopia Gateways provide an effective solution for connecting IP video conferencing networks with ISDN and PSTN networks allowing connectivity to ISDN H.320 endpoints or to standard telephones or mobile phones.

- ISDN PRI models support up to 2 PRI T1/E1
- ISDN BRI model supports up to 4 BRI
- V.35/RS-449/EIA-530/EIA-530A model available
- H.323 over IP
- H.320 over ISDN or V.35/RS-449/EIA-530/EIA-530A

**JENNE PART NUMBER:**

- 55782-00601 Single PRI Gateway
- 55782-00602 Dual PRI Gateway
